

**REMARKS**

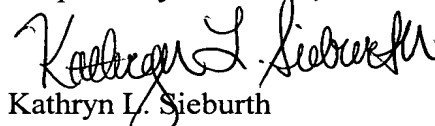

This Preliminary Amendment is being made upon entry of International Application No. PCT/US03/09039 into the U.S. National Phase of prosecution.

In the specification, a new paragraph has been added to the first line of the specification to include the priority information. An Abstract on a separate sheet is attached as required under 37 CFR 1.72(b).

The specification and claims 1 and 18-20 have been amended to correct an obvious error to recite that in an embodiment of the compounds of this invention,  $n=2$ . Applicants respectfully submit that this amendment does not add new matter, in accordance with MPEP 2163.07 and *In re Oda*. Applicants respectfully submit that one skilled in the art would recognize that the compounds exemplified in the subject specification contain a two carbon chain moiety between the fused-ring heterocyclic moiety and the nitrogen moiety of Formulas I and II- rather than a three carbon chain moiety. That is, one skilled in the art would not only recognize that the statement "In specific embodiments,  $n=3$ " is erroneous, but would also recognize that the appropriate correction would be "In specific embodiments,  $n=2$ ". Entry of these amendments into the record is respectfully requested.

Claims 9, 10, 24 and 31-38 have been cancelled without prejudice or disclaimer. Support for the amendment to claim 23 may be found in claim 24. Claims 4-8, 11-17, 19, 20, 23, 25 and 29 have been amended to remove multiple dependencies.

Respectfully submitted,

Kathryn L. Sieburth  
Attorney for Applicants
